

Service Description

bCourses is Berkeley's new Learning Management System (LMS) powered by Instructure Canvas. The LMS is an online system designed for the delivery of course content, online engagement between students and instructors, and the management of student work in support of face-to-face, blended, and online classes.

How does it work?

Instructors use bCourses for a wide variety of instructional benefits, including:

Faculty Benefits

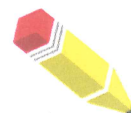

Create engaging course sites

Schedule assignments, discussions, & quizzes

Post announcements and send messages to keep students informed between classes

Use the Speedgrader to efficiently evaluate student work and post grades

Student Benefits

One place to access course materials & stay on track

Upload assignments from popular cloud services

Engage in online discussions

Easy access from your desktop, laptop, or mobile phone

Getting a Site for Your DeCal Class

1. Undergraduate Course Facilitators must ask their faculty sponsor, who is the instructor of record, to create a site. (Help article: "Create a Course Site")

2. After the site is created, the faculty sponsor must add you and any other course facilitators in the "Teacher" role so that you can manage the site. (Help article: "Adding People")

For help, search the ETS Knowledge Base using the article titles noted above:
